

Dear Jane,

Flower as a motif is a subject matter of my work. I was impressed by a variety of floral patterns in your house. I can find them in your Quilt, the patchwork quilt in Admiral's room, the historical design of wallpapers, some dresses, and scarfs. I think you love flowers. Floral design in your house is within vintage and historical since 19th century.

My work is a series of small drawings or paintings of flowers, plants, and fungi to respond to those floral patterns in your house. I want to create a dialogue between your flowers and my flowers.

I wish you like my 'Flora Book'.

Yours truly,

Betty
